

INVITATION FOR SUPPLY OF BIOMASS PELLETS TO FACILITATE ENVIRONMENT-FRIENDLY POWER PRODUCTION

Let us nurture nature to have a nurturing future

Burning of crop stubble contributes a sizeable portion in air pollution, mostly in Northern India. With an objective towards addressing this problem and as an environmentally responsible Corporate Organization, Adani Power has initiated co-firing of biomass pellets for our various thermal power plants across India.

Adani Power invites bids from interested agencies and vendors to supply biomass pellets for it's following Power Plants:

1. 3300 MW Thermal Power Plant at Tiroda, Maharashtra
2. 1320 MW Thermal Power Plant at Baran, Rajasthan
3. 1200 MW Thermal Power Plant at Udupi, Karnataka
4. 600 MW Thermal Power Plant at Raigarh, Chhattisgarh
5. 1370 MW Thermal Power Plant at Raipur, Chhattisgarh
