At Adani Power Limited, we are committed to Protecting the environment and integrating environmentally sound practices into every aspect of our operations. Continuous improvement and environmental stewardship are integral to our business, and we strive to minimize environmental impacts while attaining a leadership position in environmental management through defined roles and responsibilities.

This policy is applicable to all production and business operations, corporate operations, and services provided by Adani Power Limited. It includes our value chain partners such as suppliers, contractors, distribution and logistics partners, joint venture partners, non-managed operations, and any other key business partners. The policy also sets ground rules for due diligence, mergers, and acquisitions.

We have implemented an IMS at all our locations within the operational boundary. The respective plant heads are responsible for implementing the policy at the plant level in consultation with the corporate environment team. The Chief Sustainability Officer oversees the implementation of the policy across operations.

Our commitment shall be realized by:

- Building and operating the facilities in compliance with all applicable environmental laws, regulations, and obligations. We endeavour to go beyond compliance to achieve superior environmental performance.
- Identifying and evaluating environmental and climate impacts and their associated risks for all activities. Develop and deploy effective mitigation strategies which are harmonious with Community practices and regulatory requirements.
- Continuously improving environmental performance by setting and reviewing objectives, targets, and processes for efficient use of natural resources, waste minimization, emission reduction, and pollution prevention.
- Conserving and protecting the biodiversity in and around our Project and operational sites by facilitating a proactive and an ongoing involvement of relevant stakeholders.
- Conducting environmental due diligence for new projects, expansion of existing projects, mergers, and acquisitions and Supply chain in accordance with the procedures which are regularly reviewed and updated to match sectoral issues and dynamic needs and expectations of the business and stakeholder requirements.

- Measuring, monitoring and reviewing the environmental performance in accordance with this policy. Conduct regular audits (internal and external) to assess compliance and communicate findings to relevant stakeholders.
- Conducting training for employees to stakeholder, including employees, customers, vendors, and local communities to enable and empower them understand environmental impacts of their work activities and how they can contribute to our environmental goals

We shall be guided by the principles of environmental management systems in ensuring this policy is approved, overseen, reviewed, and adopted by senior management. We are committed to integrating these principles into our management and governance practices to enhance our environmental performance and sustainability.

Our commitment to enhancing our environmental performance and reducing our environmental footprint by ensuring equitable access to natural resources. We foster a culture of shared values, care, and commitment while pursuing continual improvement in line with management system principles. Our team's dedication, commitment, and capabilities are central to achieving these goals.
