Description and Rationale for the Scheme

19. The Scheme, inter alia, provides for :
- (i) transfer and vesting of the Mundra Power Generation Undertaking (as defined in the Scheme) of the Transferor Company to the Transferee Company with effect from the Appointed Date (as

defined in the Scheme), as a going concern on a Slump Exchange (as defined in the Scheme) basis;

- (ii) reduction of the Securities Premium Account of the Transferor Company;
- (iii) increase in the authorised share capital of the Transferee Company; and
- (iv) for matters consequential, incidental, supplemental and/or otherwise integrally connected therewith.

20. The rationale and purpose of the Scheme is as under:

- (a) The Transferor Company was originally envisaged to be a power generating company. However, with the growth opportunities in the form of new power projects as well as acquisitions, it no longer retains the original nature. The characteristics of risk, growth, funding requirements and cash flows involved with the Transferor Company's distinct activities, i.e. investments and power generation are quite distinct. There are also differences in which these two activities are required to be organized and managed. The Transferor Company proposes to separate the power generation from investments by effecting transfer and vesting of the Mundra Power Generating Business as a going concern, on Slump Exchange basis, to the Transferee Company in order to enhance the focus provided to the distinct activities.
- (b) The transfer and vesting of the Mundra Power Generating Business into the Transferee Company will create a clean platform and allow the Transferor Company to source its funding more efficiently for investing in capacity expansion of its subsidiaries and/or acquisition of assets.
- (c) Separation of the Mundra Power Generating Business into the Transferee Company will put at par with the other operating subsidiaries of the Transferor Company, with specific strategic focus as well as specific financial arrangements.
- (d) Transfer and vesting of the Mundra Power Generating Business to the Transferee Company will allow induction of capital/strategic investor into the Mundra Power Generating Business.

- 1.2. The Transferor Company is a part of Adani Group with various business interests. The brief description of the major activities being carried out by the Transferor Company along with its subsidiaries are as under:
 - (a) The Transferor Company is engaged in the business of generating power and for the said purpose has set-up and commissioned 4,620 MW thermal power plant (comprising of 9 units, i.e. 4 units of 330 MW each and 5 units of 660 MW each) in the multi product Special Economic Zone, at Village Tunda and Siracha, Taluka Mundra, District Kutch, Gujarat, being developed by Adani Ports and Special Economic Zone Limited. - 1.3. Adani Power (Mundra) Limited (the "Transferee Company") is a company incorporated on 16th Day of February, 2015 with the Registrar of Companies, Gujarat, under the provisions of the Companies Act, 2013 in the name of Adani Power (Karnataka) Limited with Corporate Identification Number U40300GJ2015PLC082295. The name of Adani Power (Karnataka) Limited was changed to Adani Power (Mundra) Limited with effect from 27th day of April 2017. The Transferee Company is an unlisted public limited company, having its registered office at Adani House, Near Mithakhali Six Roads, Navrangpura, Ahmedabad- 380 009, Gujarat. The Transferor Company along with its wholly owned subsidiary, Adani Power (Jharkhand) Limited, holds 100% of the paid-up equity share capital of the Transferee Company (the Transferor Company and Adani Power (Jharkhand) Limited hold 99% and 1%, respectively, in the paid-up equity share capital of the Transferee Company).

Presently, no business is being carried out by the Transferee Company.
- 1.5. Rationale for restructuring:
- (a) The Transferor Company was originally envisaged to be a power generating company. However, with the growth opportunities in the form of new power projects as well as acquisitions, it no longer retains the original nature. The characteristics of risk, growth, funding requirements and cash flows involved with the Transferor Company's distinct activities, i.e. investments and power generation are quite distinct. There are also differences in which these two activities are required to be organized and managed. The Transferor Company proposes to separate the power generation from investments by effecting transfer and vesting of the Mundra Power Generating Business as a going concern, on Slump Exchange basis, to the Transferee Company in order to enhance the focus provided to the distinct activities.
 - (b) The transfer and vesting of the Mundra Power Generating Business into the Transferee Company will create a clean platform and allow the Transferor Company to source its funding more efficiently for investing in capacity expansion of its subsidiaries and/or acquisition of assets.
 - (c) Separation of the Mundra Power Generating Business into the Transferee Company will put at par with the other operating subsidiaries of the Transferor Company, with specific strategic focus as well as specific financial arrangements.
 - (d) Transfer and vesting of the Mundra Power Generating Business to the Transferee Company will allow induction of capital/strategic investor into the Mundra Power Generating Business.
- 1.6. This Scheme is divided into the following parts:
- (i) **Part I**, which deals with the introduction, definitions, date of taking effect and share capital;
 - (ii) **Part II**, which deals with the transfer and vesting of the Mundra Power Generating Undertaking; and

SOURCES OF INFORMATION

In connection with preparing this Valuation Report, we have received the following information from the Management:

- Unaudited carved out Balance Sheet pertaining to the Target Business for FY 2017;
- Projected cash flows for the Target Business from 1 April 2017 to 31 March 2053 (Management Business Plan);
- Interviews and discussions with the Management to augment our knowledge of the Target Business;
- Other information, explanations and representations that were required and provided by the Management;
- For our analysis, we have relied on published and secondary sources of data, whether or not made available by Management. We have not independently verified the accuracy or timeliness of the same; and
- Such other analysis, review and enquires, as we considered necessary.

APPROACH - BASIS OF TRANSFER

The Proposed Transfer contemplates the transfer of Target Business to a new Subsidiary pursuant to the Scheme.

There are several commonly used and accepted methods for determining the valuation of Target Business, which have been considered in the present case, to the extent relevant and applicable, including:

1. Comparable Companies' Multiples and Transaction multiples method
2. Market Price method
3. Discounted Cash Flows method
4. Net Asset Value method

It should be understood that the valuation of any business or its assets is inherently imprecise and is subject to certain uncertainties and contingencies, all of which are difficult to predict and are beyond our control. In performing our analysis, we made numerous assumptions with respect to industry performance and general business and economic conditions, many of which are beyond the control of the Company/ Target Business. In addition, this valuation will fluctuate with changes in prevailing market conditions, the conditions and prospects, financial and otherwise, of the Target Business, and other factors which generally influence the valuation of companies and their assets.

The application of any particular method of valuation depends on the purpose for which the valuation is done. Although different values may exist for different purposes, it

cannot be too strongly emphasized that a Valuer can only arrive at one value for one purpose. Our choice of methodology of valuation has been arrived at using usual and conventional methodologies adopted for Proposed Transfer of a similar nature and our reasonable judgment, in an independent and bona fide manner based on our previous experience of assignments of a similar nature.

Comparable Companies' Multiple (CCM) / Comparable Transactions Multiple method

Under this method, value of the Target Business is arrived at by using multiples derived from valuations of comparable companies, as manifest through stock market valuations of listed companies. This valuation is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

We have screened and analysed comparable companies listed in India having business operations similar to Target Business. However, we have not considered the comparable companies method as the Target Business is specific to one particular plant which is not directly comparable to any listed companies. The listed companies have a portfolio of plants which are currently at different stages of operations. Similarly, many of them run on alternate source of fuel as well. However, for the limited purpose of computing WACC, we have considered beta and debt equity ratio of companies with similar business profile to that of Target Business in India.

We have analyzed recent transactions in the power industry to ascertain their comparability with the Target Business. However, we have not considered comparable transaction method for the Valuation due to non-availability of complete details on comparable transactions in public domain. Further, before considering any comparable transaction it is necessary to understand the different purpose of investment, transaction rationale and synergy benefits etc., since different control premiums and minority discounts may be embedded in transaction values.

Market Price Method

The market price of an equity share as quoted on a stock exchange is normally considered as the value of the equity shares of that company where such quotations are arising from the shares being regularly and freely traded in. Though APL is a listed entity, we are valuing the Target Business (part of the listed company) and therefore, the market price cannot be specifically attributed to the Target Business. Hence this method has not been considered for valuation of Target Business.

Discounted Cash Flows ("DCF") Method

Discounted Cash Flow Method ("DCF Method") is a form of the income approach that is commonly used to value businesses or equity interests.

Under the DCF method, the projected free cash flows to the business are discounted at the weighted average cost of capital. The sum of the discounted value of such free cash flows is the value of the business.

Discounted cash flow methodology typically requires the forecast period to be of such a length to enable the business to achieve a stabilized level of earnings, or to be reflective of an entire operation cycle for more cyclical industries.

The rate at which the future cash flows are discounted ("the discount rate") should reflect not only the time value of money, but also the risk associated with the business' future operations. The discount rate employed is Weighted Average Cost of Capital ("WACC") reflecting an optimal as opposed to actual financing structure.

We have applied the DCF method for valuing the Target Business on a standalone basis using past trends, longer term forecasts based on past and current financial trends and general economy and industry outlook. The DCF method incorporates all factors relevant to business e.g., current and future competitive position, financial and business risks, etc., where the estimated cash flows of the business used for valuation take cognizance of these factors.

Using the DCF analysis involves determining the following:

Estimating future free cash flows:

Free cash flows are the cash flows expected to be generated by the Target Business that are available to all providers of the company's capital – both debt and equity.

Appropriate discount rate to be applied to cash flows i.e. the cost of capital.

This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to all the capital providers (namely shareholders and lenders), weighted by their relative contribution to the total capital of the company. The opportunity cost to the equity capital provider equals the rate of return the capital provider expects to earn on other investments of equivalent risk.

We have considered the forecast free cash flow of Target Business based on Management Business Plan as provided by the Management. We must emphasize that realisations of free cash flow forecast will be dependent on the continuing validity of assumptions on which they are based. Our analysis, therefore, will not, and cannot be directed to providing any assurance about the achievability of the final projections. Since the financial forecasts relate to future, actual results are likely to be different from the projected results because events and circumstances do not occur as expected, and the differences may be material. While carrying out this engagement, we have relied extensively on historical information made available to us by the Management and the Management Business Plan for future related information. We did not carry out any validation procedures or due diligence with respect to the information provided/

extracted or carry out any verification of the assets or comment on the achievability and reasonableness of the assumptions underlying the Management Business Plan, save for satisfying ourselves to the extent possible that they are consistent with other information provided to us in the course of this engagement.

Detailed working of DCF has been provided separately.

To arrive at the net value of the Target Business, the value arrived under DCF method is adjusted for the value of borrowings and cash and cash equivalents.

Net Asset Value (NAV) Method

The asset based valuation technique is based on the value of the underlying net assets of the business, either on a book value basis or realizable value basis or replacement cost basis. Under the Net Asset Value approach, total value is based on the sum of book values as recorded on the balance sheet of the Undertakings as on the Valuation Date.

We have not used Net Asset Value method for valuing the Target Business as net worth may not be representative of the ongoing value of the operating business.

VALUATION SUMMARY

The basis of transfer of the Target Business have to be determined after taking into consideration all the factors and methodologies mentioned hereinabove.

Our understanding is that the Proposed Transfer is an internal transfer to the subsidiary of APL only. In light of this, the final shareholders being remaining the same, there is no loss of economic interest to any of the shareholders.

Based on the factors discussed and outlined above, the valuation of the Target Business for the purpose of transfer is as follows:

Enterprise value of the Plant	224,748
Less: Debt	(217,718)

The Board of Directors,

Ladies / Gentlemen:

We refer to the engagement letter dated May 24, 2017 ("**Engagement Letter**") whereby Adani Power Limited ("**Transferor Company**" or "**APL**" or "**Company**") has engaged JM Financial Institutional Securities Limited ("**JM Financial**"), *inter alia*, to provide a fairness opinion to the Company on the valuation report dated June 6, 2017 ("**Valuation Report**") issued by B S R & Associates LLP (the "**Valuer**") for the proposed transfer and vesting of Mundra Power Generating Undertaking (as defined below) to Adani Power (Mundra) Limited ("**APML**" or "**Transferee Company**") as a going concern on slump exchange basis vide a scheme of arrangement under the provisions of Sections 230 to Section 232 and other applicable provisions of the Companies Act, 2013 ("**Proposed Scheme**"). We understand that the Proposed Scheme will be considered by the Board of Directors of APL.

Company Background and Purpose

APL is a public limited company incorporated under the Companies Act 1956. The Company is, *inter alia*, primarily engaged in the business of generating power. The equity shares of the Company ("**Equity Shares**") are listed on the BSE Limited ("**BSE**") and the National Stock Exchange of India Limited ("**NSE**" and together with the BSE, the "**Stock Exchanges**").

APML is a public limited company incorporated under the provisions of the Companies Act, 2013. The Transferee Company is, *inter alia*, engaged in the business of generation, distribution and supply of and to generally deal in electricity through itself and its subsidiaries/associates. The Transferor Company along with its wholly owned subsidiary, Adani Power (Jharkhand) Limited, holds 100% of the paid-up equity share capital of the Transferee Company (the Transferor Company and Adani Power (Jharkhand) Limited hold 99% and 1%, respectively, in the paid-up equity share capital of the Transferee Company).

The Company has appointed the Valuer to determine the valuation of Mundra Power Generating Undertaking ("**Valuation**") and has in terms of the Engagement Letter requested us to examine the Valuation Report issued by the Valuer and other related information provided by the Company and issue our independent opinion as to the fairness of the Valuation ("**Fairness Opinion**") as per the requirements of the SEBI circular no. CFD/DIL3/CIR/2017/21 dated March 10, 2017 ("**SEBI Circular**").

All terms not specifically defined in this Fairness Opinion shall carry the same meaning as in the Proposed Scheme.

Brief Background of the Proposed Scheme

The Transferor Company has set-up and commissioned 4,620 MW thermal power plant in the multi product Special Economic Zone at Mundra, District Kutch, Gujarat being developed by Adani Ports and Special Economic Zone Limited. Pursuant to the approval granted by the Government of India, Ministry

of Commerce & Industry, Department of Commerce, the Transferor Company is a Co-Developer in the said multi product Special Economic Zone for setting up of generation, transmission, distribution of power and related infrastructure facilities on an area of 293.8810 hectares (“**Mundra Power Generating Undertaking**”).

APL under the Proposed Scheme is desirous of transferring Mundra Power Generating Undertaking to APML as a “going concern” on a slump exchange basis under the proposed Scheme of Arrangement for a lump sum consideration in the form of issuance of equity shares by the Transferee Company to the Transferor Company.

The Transferor Company was originally envisaged to be a power generating company but over the period, it has two distinct activities, i.e. investments and power generation. The Transferor Company proposes to separate the two by effecting slump exchange of its Mundra Power Generating Undertaking on a going concern basis to the Transferee Company in order to enhance the focus of the two distinct activities.

Separation of the Mundra Power Generating Undertaking into the Transferee Company will also put it at par with the other operating subsidiaries of the Transferor Company, with independent strategic focus and specific financial arrangements.

The proposed transfer under the scheme will also create a clean platform and allow the Transferor Company to source its funding more efficiently for investing in capacity expansion of its subsidiaries and/or acquisition of assets.

We understand that the consideration at which the Mundra Power Generating Undertaking is proposed to be transferred under the Scheme is determined to be Rs. 106 crore which shall be discharged by way of issuance of equity shares by the Transferee Company to the Transferor Company.

Source of Information

For the said examination and for arriving at the opinion set forth below, we have received:

1. Valuation Report issued by the Valuer;
2. Draft of the Proposed Scheme;
3. Projected cash flows for the Mundra Power Generating Undertaking (Management Business Plan); and
4. Necessary explanations and information from the representatives of APL.

The aforesaid business activities are hereinafter referred to as "Mundra Power Generation Business".
- Adani Power (Mundra) Limited ("Transferee Company") has been incorporated with an object to, inter alia, carry on the business of generation, distribution and supply of and to generally deal in electricity through itself and its subsidiaries/associates. Presently, no business is being carried out by the Transferee Company.

The characteristics of risk, growth, funding requirements and cash flows involved with the Transferor Company's distinct activities, i.e. investments and power generation are quite distinct. There are also differences in which these two activities are required to be organized and managed. The Transferor Company proposes to separate the power generation from investments by effecting transfer and vesting of the Mundra Power Generating Business as a going concern, on Slump Exchange basis, to the Transferee Company in order to enhance the focus provided to the distinct activities.
- Accordingly, the Scheme under Sections 230 to 232 read with Sections 13, 52, 61 and 65 of the Act (as defined hereinafter) and other relevant provisions of the Act for the transfer and vesting of the Mundra Power Generation Undertaking of the Transferor Company to the Transferee Company with effect from the Appointed Date i.e. 3rd March, 2017, as a going concern on a Slump Exchange basis; reduction of securities premium account of the Transferor Company; increase in the authorised share capital of the Transferee Company; and for matters

Vwest

consequential, incidental, supplemental and/or otherwise integrally connected therewith.

Basis of Valuation:

- B S R & Associates LLP, independent chartered accountants had carried out valuation on the basis of Net Asset Value (NAV) Method, Discounted Cash Flows (DCF) Method, Market Price Method and Comparable Companies' Multiple (CCM) / Comparable Transactions Multiple Method in arriving at the valuation of Mundra Power Generating Business Undertaking of the Transferor Company for INR 106 Crores.
- Based on the valuation report, the Board of Directors approved the lump sum consideration of INR 105 Crores and vesting of Mundra Power Generating Business Undertaking to the transferee Company.

Fairness Opinion:

- JM Financial Institutional Securities Limited, a category I Merchant Banker has concluded that the lump sum consideration of INR 106 Crores in respect of Mundra Power Generating Business Undertaking of Transferor Company is fair.

4. Further to the execution of a share purchase agreement with the owners of Korba West Power Company Limited ("KWPC"), the acquisition of 100% stake in KWPC is pending for necessary approval and consents.
5. Exceptional Item includes :
 - i) Reversal of revenue in the nature of Compensatory Tariff of ₹ 3,619.49 crores recognised upto 31st March, 2016, pursuant to the order of the Hon'ble Supreme Court dated 11th April, 2017 (Refer Note 6 for further details).
 - ii) Write off of advances given to Brakel Kinnaur Power Private Limited of ₹ 288.45 crores due to delay in initiation of underlying project for which the said advance was given.

6. Pursuant to the Central Electricity Regulatory Commission ("CERC") order dated 21st February, 2014, the Company had recognized revenue in the nature of Compensatory Tariff ("CT") of ₹ 3,938.65 crores upto 31st December, 2016 in respect of a long term Power Purchase Agreement ("PPA") (Bid 2) of 1000 MW entered into with Gujarat Urja Vikas Nigam Limited ("GUVNL") and other long term PPAs of 1424 MW entered into with Haryana Utilities. In addition, the Company had also recognized CT of ₹ 426.19 crores upto 31st December, 2016 in respect of another long term PPA (Bid 1) of 1000 MW entered into with GUVNL.

The said order was challenged in the Appellate Tribunal for Electricity ("APTEL"). The APTEL vide its order dated 7th April, 2016, had set aside the aforementioned CERC order and had held that the promulgation of Indonesian regulation constitute Force Majeure event which was contested in the Hon'ble Supreme Court. The Hon'ble Supreme Court, vide its order dated 11th April, 2017 has set aside the aforementioned APTEL order and has ruled that said event is neither Force Majeure nor Change in Law as per the terms of PPA and hence, does not entitle Company for CT. Consequently, the Company has derecognised its claim on account of CT of ₹ 4,364.84 crores recognized up to 31st December, 2016, out of which, of ₹ 3,619.49 crores (recognised upto 31st March, 2016) is shown as an exceptional item (refer note 5i) and ₹ 745.35 crores (recognised from 1st April, 2016 to 31st December, 2016) has been adjusted from the revenue from operations. Accordingly, the revenue from operations pertaining to quarter ending 31st December, 2016 has been restated by ₹ 344.28 crores.

Further, the aforesaid order of the Hon'ble Supreme Court also held that the non-availability of domestic coal due to change in policy or Change in Law, in force in India, constitute Change in Law as per the terms of PPA. The Hon. Supreme Court directed the CERC to determine the relief under clause 13 of PPA. The Company has filed a petition with CERC to ascertain the relief that may be available to the Company.

7. The Company has determined the recoverable amounts of the Power Plants over its useful life under Ind AS 36, Impairment of Assets based on the estimates relating to tariff, operational performance of the Plants, life extension plans, market prices of coal and other fuels, exchange variations, inflation, terminal value etc. which are considered reasonable by the Management.

On a careful evaluation of the aforesaid factors, the Management of the Company has concluded that the Recoverable Amounts of the Power Plants are higher than their carrying amounts as at 31st March, 2017.

8. For the financial year ended 31st March, 2017, the Company has incurred a loss of ₹ 6,054.34 crores and as at the year end, current liabilities (including ₹ 7,234.06 Crores to related parties) exceed current assets by ₹ 12,688.47 Crores. 2 Significant accounting policies

2.1 Basis of preparation

The financial statements of the Company have been prepared in compliance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, on the historical cost basis except for certain financial instruments that are measured at fair values, as explained in the accounting policies below.

These Financial Statements are the Company's first Ind AS Financial Statements as covered by Ind AS 101, 'First-time adoption of Indian Accounting Standards'. For all periods up to and including the year ended 31st March, 2016, the Company had prepared its Financial Statements in accordance with Indian GAAP, including Accounting Standards (AS) notified under the Companies (Accounting Standards) Rules, 2006 (as amended), which is considered as "Previous GAAP". A description of the transition to Ind-AS and its impact on Company's net profit and equity has been provided in Note 4 "First Time Adoption of Ind-AS".

2.2 Summary of significant accounting policies

a Financial Instruments

Financial assets and financial liabilities are recognised when an entity becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

b Financial assets

Initial recognition and measurement

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis.

All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

Classification of financial assets

Financial assets that meet the following conditions are subsequently measured at amortised cost (except for debt instruments that are designated as at fair value through profit or loss on initial recognition):

- the asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and
 - the contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and interest.
- All other financial assets are subsequently measured at fair value.

Effective interest method

The effective interest method is a method of calculating the amortised cost of a financial assets and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and transaction costs and other premiums or discounts) through the expected life of the financial assets, or where appropriate, a shorter period, to the net carrying amount on initial recognition.

Interest is recognised on an effective interest basis for debt instruments other than those financial assets classified as at Fair Value through Profit and Loss (FVTPL). Interest income is recognised in profit or loss and is included in the "Other income" line item.

Financial assets at cost

Investments in subsidiaries, associates and joint ventures are accounted for at cost.

Financial assets at fair value through profit or loss (FVTPL)

Financial assets that do not meet the amortised cost criteria or Fair value through other comprehensive Income (FVOCI) criteria are measured at FVTPL.

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any dividend or interest earned on the financial asset and is included in the "Other income" line item.

Derecognition of financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in profit or loss if such gain or loss would have otherwise been recognised in profit or loss on disposal of that financial asset.

Financial liabilities and equity instruments

Classification as debt or equity

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognised at the proceeds received, net of direct issue costs.

Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest method or at FVTPL.

Financial liabilities at FVTPL

A financial liability may be designated as at FVTPL upon initial recognition if:

- such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise;
- the financial liability whose performance is evaluated on a fair value basis, in accordance with the Company's documented risk management;

Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any interest paid on the financial liability.

Fair values are determined in the manner described in note 16.

Financial liabilities at amortised cost

Financial liabilities that are not held-for-trading and are not designated as at FVTPL are measured at amortised cost at the end of subsequent accounting periods. The carrying amounts of financial liabilities that are subsequently measured at amortised cost are determined based on the effective interest method. Interest expense that is not capitalised as part of costs of an asset is included in the 'Finance costs' line item.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

Derecognition of financial liabilities

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. An exchange between with a lender of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss. The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. An exchange between with a lender of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

Operating Cycle

Based on the nature of products / activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

e Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the financial asset or settle the financial liability takes place either:

- in the principal market, or
- in the absence of a principal market, in the most advantageous market

The principal or the most advantageous market must be accessible by the Company.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (Unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

At each reporting date, the Management analyses the movements in the values of assets and liabilities which are required to be remeasured or re-assessed as per the Company's accounting policies.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

f Revenue recognition

Interest Income is recognised on time proportion basis. Dividend income is accounted for when the right to receive income is established.

g Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

h Taxation

Tax on Income comprises current and deferred tax. It is recognised in statement of profit and loss except to the extent that it relates to a business combination, or items recognised directly in equity or in other comprehensive income.

Current tax

Tax on Income for the current period is determined on the basis on estimated taxable income and tax credits computed in accordance with the provisions of the relevant tax laws and based on the expected outcome of assessments / appeals. Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred tax

Deferred tax is recognized for the future tax consequences of deductible temporary differences between the carrying values of assets and liabilities and their respective tax bases at the reporting date, using the tax rates and laws that are enacted or substantively enacted as on reporting date. Deferred tax liability are generally recorded for all temporary timing differences. Deferred tax assets are recognized to the extent that it is probable that future taxable income will be available against which the deductible temporary differences can be utilised. Deferred tax relating to items recognized outside the statement of profit and loss is recognized outside the statement of profit and loss, either in other comprehensive income or directly in equity. The carrying amount of deferred tax assets is reviewed at each reporting date.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

i) **Earning per Share :**

Basic earnings per share is computed by dividing the profit / (loss) after tax by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the profit / (loss) after tax as adjusted for the effects of dividend, interest and other charges relating to the dilutive potential equity shares by weighted average number of shares plus dilutive potential equity shares.

j) **Provisions, Contingent Liabilities and Contingent Assets**

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event; it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material). When the Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Contingent liabilities are not recognised but are disclosed in the notes. Contingent assets are not recognised but are disclosed in the notes where an inflow of economic benefits is probable.

3) **Significant accounting judgements, estimates and assumptions**

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Estimates and assumptions

The estimates at 31st March, 2016 are consistent with those made for the same dates in accordance with Indian GAAP (after adjustments to reflect any differences in accounting policies) apart from the following items where application of Indian GAAP did not require estimation:

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. Existing circumstances and assumptions about future developments may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

i) **Fair value measurement of financial instruments**

When the fair value of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using ECL model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

4 First-time adoption of Ind-AS

These are Company's first financial statements prepared in accordance with Ind AS. For the period ended 31st March, 2016, the Company prepared its financial statements in accordance with accounting standards notified under section 133 of the Companies Act 2013.

The Company has prepared these financial statements for the year ending on 31st March, 2017, together with the comparative period data, by applying Ind AS compliant policies described in the 'Summary of Significant Accounting Policies'. This note explains the options availed on first time adoption of Ind AS 101 and the principal adjustments made by the Company in restating its Indian GAAP financial statements, as at end for the period ended 31st March, 2016.

a) Options availed on the first time adoption of Ind AS 101

i) Estimates

The estimates at 31st March 2016 are consistent with those made for the same dates in accordance with Indian GAAP (after adjustments to reflect any differences in accounting policies) apart from the following items where application of Indian GAAP did not require estimation:

> Impairment of financial assets based on the risk exposure and application of ECL model

The estimates used by the Company to present these amounts in accordance with Ind AS reflect conditions as of 31st March, 2016.

ii) Classification and measurement of financial assets :

The Company has assessed classification and measurement of financial assets on the basis of facts and circumstances that exist as on transition date

iii) Impairment of financial assets

The Company has applied impairment requirements of Ind AS 109 retrospectively; however, as permitted by Ind AS 101, it has used reasonable and supportable information that is available without undue cost or effort to determine the credit risk at the date that financial instruments were initially recognised in order to compare it with the credit risk at the transition date.

iv) Derecognition of financial assets and financial liabilities

The Company has applied the derecognition requirements of financial assets and financial liabilities prospectively for transactions occurring on or after transition date
